

WHY CAN'T I GET EMAILS?

I'M OUT OF TOWN, NOT IN OUTER SPACE

SERVICE PROFILE Pure Connect

Always be in touch, wherever you are.

**Pure Connect means never having
to be out of touch with your business or your clients.**

No company can operate in today's business environment without being connected.

Pure Connect is a complete solution to your connectivity requirements. Our goal is to integrate the best technology solutions into your business in a way that will enhance productivity and efficiency.

From web and email services for small or medium size businesses or large national operations, through to providing complete connectivity solutions for regionalised businesses including communication and monitoring of remote workforces.

Communications solutions

Pure Connect provides a complete end to end solution. From setting up email addresses and integrating telephone systems, to providing remote access solutions and multi platform accessibility, we make sure you and your workforce are always in the picture, whether at home on the computer, out and about on the mobile or on the train with a Blackberry.

Business broadband

Being able to communicate with people, and for people to be able to communicate with you is critical to a modern business. Our broadband services are flexible enough to grow with your business, or powerful enough to support global operations.

Leased lines

Pure Connect leased lines are a business class connectivity solution. We have developed a comprehensive product range to suit all accessibility requirements - enhanced by our own robust, resilient network infrastructure - to provide solutions anywhere.

Our flexible approach allows us to cater for all business requirements providing solutions at speeds of 64Kbps up to a powerful 1Gbps, backhauled over Pure's high performance network, to provide a true best-in-class uncontended service.

Security

Drawing on a proven expertise of security management Pure Connect is ideally positioned to provide your business with peace of mind through a quality and reliable network security solution, managed by our team of fully qualified and accredited network technicians.

Continuity Planning

The provision of either a Satellite or Wireless back-up solution for our clients is key to the provision of Critical Connectivity to give you a true 100% connectivity solution.

The use of a range of services from our key partners ensures we are able to provide an outstanding level of service.
